

COMMUNICABLE DISEASE REVIEW
(USING COVID-19)

1. What type of pathogen is associated with COVID19? (*bacteria, virus, protozoan, fungus*)
2. What is the method of transmission for this infection? (*in other words, how does it spread? Direct contact, indirect contact, through a vector, through contaminated food or water, airborne?*)
3. Is this infection localized (*effects one area of the body*) or generalized (*throughout the body*)?
4. What is the length of infection for this illness? Is it acute (*lasts a short time*) or chronic (*lasts a long time, potentially one's whole life*)?
5. COVID-19 is considered a pandemic. What does this mean?

6, 7, 8, 9, 10: Although no one has immunity to this pathogen, what steps can be taken to reduce the risk of contracting/spreading COVID-19? (*hint: look up "DO*
